

OUR COMMITMENT TO SAFETY:

- 1) Before beginning a project, ask the customer to pan their phone around the project site to identify risks for tripping, falling or other injury, and then mitigate those risks to the degree it is possible.
- 2) Before beginning a project, ask the customer to show the tools and instrumentalities they intend to use in the project, make sure these items are safe.
- 3) Before beginning a task, ask the customer to place the phone down so they can use both hands.
- 4) Never virtually work with wiring that is powered, even if it is turned off at the breaker.
- 5) Never virtually work with a customer on a ladder.
- 6) Never virtually work with a customer using power tools.
